

unleash the power of the **GS Sub** with the new **CentriPro**TM motor

The Goulds Pumps **GS sub** and the new **CentriPro** 4-inch submersible motor provide the next generation in submersible pump and motor technology, today.

The **GS Sub** (with the new Guardian[®] System) features an engineered polymer bearing, our floating impeller stack design and stainless steel bowls. **CentriPro** motors feature laser welded, cast stainless steel end bells and 700-lb thrust bearings for trouble-free, reliable service and long life.

The line of new 4-inch **CentriPro** motors is available in the quiet running 2-wire model and the capacitor start 3-wire model. The **GS Sub** and the new **CentriPro** motor are designed for optimum performance with both **CentriPro** and **Goulds Pumps** control boxes.

For more information about the new **CentriPro** motors, **Goulds Pumps** and **CentriPro** control boxes, the **GS Sub**, or any of our other pumps and controls, please call 315-255-3378 or visit www.goulds.com.
